Sed. Form 1-A

SEDATION IN DENTAL PRACTICE - As prescribed in Guidelines For The Use of Sedation In Dental Practice, January 2010.

Oral administration of a single sedative drug is an accepted treatment modality by virtue of training/licensure as a dentist and does not require a permit issued by the Provincial Dental Board of Nova Scotia. Utilization of conscious sedation techniques beyond a single sedative drug does require a permit. In either case, please complete and return this form.

Please be advised that I utilize sedation in my dental practice. I use the following specific sedation protocols:

CONSCIOUS SEDATION:

- | | |
|--|------------------|
| 1. Nitrous Oxide and Oxygen Conscious Sedation | Yes_____ No_____ |
| 2. Combination of Oral Sedation drugs or Nitrous Oxide/
Oxygen with a single Oral Sedative Drug. | Yes_____ No_____ |
| 3. Parenteral Conscious Sedation (intravenous, intramuscular,
subcutaneous, submucosal) single drug | Yes_____ No_____ |

I confirm that I meet the appropriate requirements for training, sedation equipment and drugs for the management of emergencies as outlined in the Guidelines For The Use Of Sedation In Dental Practice, January 2010.
